12	API_6633	Customer Portal - Session Management User is logged out due to session expiration even while actively using the application [Inconsistency]	Bug

Database Migrations

#	Migration	Type	Summary
1	20260420073911_AddCookiePolicy	EF_MIGRATION / TABLE	Creates <code>CookiePolicies</code> tab for versioned cookie policy content with publish status
2	20260420074917_AddTransactionEmailLog	EF_MIGRATION / TABLE	Creates <code>TransactionEmailLog</code> table for tracking email send status per transaction
3	20260420084235_AddTransactionEmailLogCompositeIndex	EF_MIGRATION / INDEX	Replaces single-column index with composite index on (<code>TransactionId</code> , <code>EmailType</code> , <code>SentAt</code>)

Key Highlights

- **Cookie Policy:** Full Cookie Policy feature delivered across all three components — admin can create, update, publish, and delete policies; customers see a consent popup on first visit.
- **CA Email Templates:** CA team email notification templates implemented end-to-end with transaction email logging for delivery tracking.
- **Session Management:** Fixed global logout affecting all sessions when logging out from one, and fixed premature session expiry for active users.
- **Address Autocomplete:** Fixed UK address persistence across nationality changes and Address Line 2 being excluded from autocomplete selection.
- **Input Validation:** Fixed phone number, ID number, and business registration number fields accepting all-zero inputs; fixed business name/trading name character limit enforcement.
- **Revenue Reports:** Corrected revenue report calculation and export accuracy across Admin Portal and API.
- **UI Consistency:** Fixed "Remember Me" checkbox, conflicting account type labels, lingering validation messages, and missing hyperlinks on Terms/Privacy Policy.
- **Transaction Receipt:** Fixed name mismatch between recipient nickname and cash collector full name in transaction receipts and PDFs.
