UAT Release Notes - 2026-05-05

Overview

This release (v1.0.6) ships across all three MoneyTransfer applications — Customer Portal, Admin Portal, and API. It covers a broad set of UI fixes (form validation, navigation, dashboard alignment), key security hardening (auth-token storage, browser autofill, CORS), the new AML beneficiary blocking flow, the countries/currencies CRUD lookup module, failed-transaction retry improvements, and reporting fixes.

Customer Portal

PR: [MT-UAT Release - Customer Portal \(2026-05-05\) v1.0.6](#)

#	Work Item	Description	Type
1	MCP_6807	[Admin Portal] – [Authentication] – [Access and Refresh Tokens Stored in Local Storage] – [After Login]	Bug
2	MCP_6818	Customer Portal – Onboarding Flow – Date of Birth – Year Dropdown Allows Invalid/Empty Selection – Validation Not Enforced	Bug
3	MCP_7248	Customer Portal – Onboarding Flow – Date of Birth – Year Dropdown Allows Invalid/Empty Selection – Validation Not Enforced	Task
4	MCP_6250	Customer-Portal-Registration – Email field accepts trailing dot in local part (user.@domain.com)	Bug
5	MCP_6952	Customer-Portal-Registration – Email field accepts trailing dot in local part (user.@domain.com)	Task
6	MCP_6770	[Customer Portal] – [Authentication] – [Session Persists Without Remember Me Enabled] – [After Browser Restart]	Bug
7	MCP_6814	[Customer Portal] – [Authentication] – [Account Remains Locked After Password Reset] – [After Multiple Forgot Password Attempts + Reset]	Task
8	MCP_6735	Dev - AAP - Block beneficiary during transaction if AML match 90%	Task
9	MCP_6821	Customer Portal – Account Switching – Personal/Business Account Data Not Updating – Incorrect Details Displayed After Switch	Bug
10	MCP_7056	Customer Portal – Account Switching – Personal/Business Account Data Not Updating – Incorrect Details Displayed After Switch	Task
11	MCP_6299	Customer Portal Onboarding – Business Name and Trading Name Fields Accept Input Exceeding Maximum Character Limit	Bug
12	MCP_6851	[Customer Portal] – [Add Recipient] – [Incorrect NIC Validation] – [Applying Sri Lankan NIC format to other country recipients]	Bug
13	MCP_6914	[Customer Portal] – [Add Recipient] – [Incorrect NIC Validation] – [Applying Sri Lankan NIC format to other country recipients]	Task
14	MCP_6858	[Customer Portal] – [Send Money] – [Beneficiary List] – [Missing Delivery Method Type] – [On recipient selection screen]	Bug
15	MCP_6919	[Customer Portal] – [Send Money] – [Beneficiary List] – [Missing Delivery Method Type] – [On recipient selection screen]	Task

#	Work Item	Description	Type
16	MCP_6820	Customer Portal – Send Money – Button Disabled Before KYC Completion – Missing User Guidance-ToolTip	Bug
17	MCP_6909	Customer Portal – Send Money – Button Disabled Before KYC Completion – Missing User Guidance-ToolTip	Task
18	MCP_6900	Open proxy with reflected-origin + credentials CORS	Task
19	MCP_6899	Auth tokens in localStorage – full XSS / account takeover	Task
20	MCP_6753	Customer Portal UI Alignment Check & Figma Updates	Product Backlog Item
21	MCP_6754	Customer Portal UI Alignment Check & Figma Updates	Task
22	MCP_6809	[All Applications] – [Authentication / Input Forms] – [Browser Autofill Not Restricted for Sensitive Fields] – [Across SpotOn and Ajeer Applications]	Bug
23	MCP_6833	Every switch Account limit 10 sec hold - Customer Portal	Task
24	MCP_6817	Customer Portal – Onboarding Flow – OTP Verification – Missing Back Navigation – Unable to Edit Phone Number	Bug
25	MCP_6881	Customer Portal – Onboarding Flow – OTP Verification – Missing Back Navigation – Unable to Edit Phone Number	Task
26	MCP_6874	[Customer Portal] – [Home Dashboard – Exchange Rates] – [Updated Time Not Displayed] – [When Viewing Latest Exchange Rates Section]	Task
27	MCP_6792	[Customer Portal] – [Home Dashboard – Exchange Rates] – [Updated Time Not Displayed] – [When Viewing Latest Exchange Rates Section]	Bug
28	MCP_6331	Add Cash Collector - Phone number field accepts all zeros (00) as a valid phone number	Bug
29	MCP_6800	[Customer Portal] – [Change Password] – [Placeholder Text Overlapping Field Labels] – [In Password Input Fields]	Bug
30	MCP_6824	Customer Portal – Add Recipient – Duplicate Nickname Allowed (Case/Space Variation Not Validated)	Bug

Admin Portal

PR: [MT-UAT Release - Admin Portal \(2026-05-05\) v1.0.6](#)

#	Work Item	Description	Type
1	MAP_6718	Admin Portal - Rates & Pricing	Status Filter Not Working
2	MAP_6844	[Admin Portal] – [Transfer Corridors] – [Refresh Button Unresponsive] – [On Transfer Corridors grid]	Bug
3	MAP_6916	[Rates & Pricing] – SpotOn Pay Fee Label Hidden When Value is 0 – Default Rule Applied	Bug
4	MAP_6731	DEV - AAP - Remove Retry Quotation	Task
5	MAP_6871	Persist last refreshed time in Rates & Pricing after hard reload	Task
6	MAP_6274	Dual Scroll Bars in "Add New Beneficiary" Modal	Bug
7	MAP_1971	Generic Validation Message on "Add New Beneficiary" Form	Bug
8	MAP_6735	Dev - AAP - Block beneficiary during transaction if AML match 90%	Task
9	MAP_6859	[Admin] - Pending Queue - Hold button remains enabled for transactions already in ON HOLD status	Bug
10	MAP_6527	Admin - Customers	Success message appears inside the Add Beneficiary popup instead of on the background page after successful submission
11	MAP_6842	[Admin] - Reports - Revenue Report fails to generate with "Something went wrong on our end" error	Bug
12	MAP_6918	[Admin] - Reports - Revenue Report fails to generate with "Something went wrong on our end" error	Task
13	MAP_6733	DEV - AAP - AML Alert - tooltip mouse over in alert type, view also not working	Task

#	Work Item	Description	Type
14	MAP_6734	Admin Portal - Corridors	Add corridor
15	MAP_6864	Admin Portal - Corridors	Add corridor
16	MAP_6890	AAP & PD - Price Rule Changes	Task
17	MAP_6780	AAP & PD - Change Min limit as 0	Task
18	MAP_6717	ADMIN PORTAL – All Transactions – Freeze Transactions Banner Text Not Clearly Visible in Dark Theme	Bug
19	MAP_6867	ADMIN PORTAL – All Transactions – Freeze Transactions Banner Text Not Clearly Visible in Dark Theme	Task
20	MAP_6948	AAP - Implement create, update functionality for countries and currencies	Task
21	MAP_6781	[Admin Portal] – [Transaction Summary Report] – [Incorrect Sender Name Displayed] – [After Profile Switch During Transaction Initiation]	Bug
22	MAP_6713	AAP - Double confirmation on - failed transaction retry	Product Backlog Item
23	MAP_6696	Admin - Ledger > Add a date/date range filter	Bug
24	MAP_6645	AAP - Rate Margin displays unnecessary "+" or "-" prefix when the value is zero	Bug
25	MAP_-	Corridor inline validation enforcement (invalid corridor / same source-destination)	Housekeeping
26	MAP_6949	Lazy load for notification panel; UI changes to identify read/unread	Housekeeping
27	MAP_-	Contact validation fix on Add/Edit Beneficiary	Housekeeping

#	Work Item	Description	Type
28	MAP_-	AML Alerts – Review button unresponsive fix	Housekeeping
29	MAP_6793/6785	reports	bug

API

PR: [MT-UAT Release - API \(2026-05-05\) v1.0.6](#)

#	Work Item	Description	Type
1	API_6818	ISO country code map to AML nationality	Bug
2	API_6731	DEV - AAP - Remove Retry Quotation (failed transaction direct retry to Executed)	Task
3	API_6948	AAP - Implement create, update functionality for countries and currencies	Task
4	API_6735	Dev - AAP - Block beneficiary during transaction if AML match 90%	Task
5	API_6842	[Admin] - Reports - Revenue Report fails to generate with "Something went wrong on our end" error	Bug
6	API_6918	[Admin] - Reports - Revenue Report fails to generate with "Something went wrong on our end" error	Task
7	API_6784	[Admin] - Reports - Transaction Summary	Report displays duplicate "Processing" status rows in the By Status breakdown
8	API_6863	[Admin] - Reports - Transaction Summary	Report displays duplicate "Processing" status rows in the By Status breakdown
9	API_6890	AAP & PD - Price Rule Changes (default ordering, negative margins, overlap fix)	Task
10	API_6899	Auth tokens in localStorage – full XSS / account takeover	Task
11	API_6811	Admin Portal – Retry Flow – Missing Fetch Quote Step – After Failed Transaction Due to Insufficient Balance	Bug
12	API_6781	[Admin Portal] – [Transaction Summary Report] – [Incorrect Sender Name Displayed] – [After Profile Switch During Transaction Initiation]	Bug
13	API_6729	DEV PDB - Payment Distributor - AML need Connect (beneficiary payload to PD)	Task

#	Work Item	Description	Type
14	API_6773	AAP - Bank details and branch admin portal	Task
15	API_6765	[Customer Portal] – [Authentication] – [Account Remains Locked After Password Reset] – [After Multiple Forgot Password Attempts + Reset]	Bug
16	API_-	Beneficiary page search fix	Housekeeping
17	API_-	Audit Logs overwriting existing records (Freeze all transactions) fix	Housekeeping
18	API_-	Logout API rapid-call handling	Housekeeping
19	API_-	Cookie SameSite=Strict change	Housekeeping

Database Migrations

- **20260429041446_AddAmlBlockFieldsToBeneficiaries** — adds `AmlBlockReason` (text, nullable), `AmlBlockedAt` (timestampz, nullable), `IsAmlBlocked` (bool, default false) to the `Beneficiaries` table. Backs the AML beneficiary blocking feature. Additive and safe.

Seed / Config Changes

- **DataSeeder** — adds 6 new `LookupAuditAction` rows (IDs 142–147): `COUNTRY_CREATED/UPDATED/DELETED`, `CURRENCY_CREATED/UPDATED/DELETED`.
- **appsettings.json** — `AmlValidation` block populated with KycAi provider configuration (`BaseUrl`, `ApiKey`, `TimeoutSeconds=30`, `CheckEndpoint`).

Key Highlights

- **Security hardening:** Removed access/refresh tokens from `localStorage` to mitigate XSS-based account takeover (MCP_6807, MCP_6899, API_6899); restricted browser autofill on sensitive fields (MCP_6809/6833); removed "Remember Me" option (MCP_6770/6814); switched cookies to `SameSite=Strict`; tightened CORS reflected-origin handling (MCP_6900); fixed account-remains-locked after password reset (MCP_6814 / API_6765).
- **AML beneficiary blocking:** New end-to-end flow blocks beneficiaries with AML match $\geq 90\%$ at session and transaction creation across CP, AP, and API (MCP/MAP/API_6735), backed by a new EF migration adding AML block fields to `Beneficiaries`.
- **Countries & Currencies CRUD:** New admin lookup module — full create/update/delete flows for countries and currencies, with audit-action seeding (MAP/API_6948).
- **Failed-transaction retry:** Direct Failed → Executed retry path with quote re-fetch and double-confirmation UX (MAP/API_6731, MAP_6713, API_6811).

- **Reporting fixes:** Revenue Report no longer fails to generate (MAP/API_6842/6918); Transaction Summary Report sender-name accuracy after profile switch (MAP/API_6781) and de-duplicated "Processing" status rows (API_6784/6863).
- **Customer onboarding & validation:** DOB year dropdown enforcement (MCP_6818/7248); business/trading name length cap (MCP_6299); email trailing-dot rejection (MCP_6250/6952); phone number all-zero rejection (MCP_6331); NIC validation per recipient country (MCP_6851/6914).
- **UX polish:** UI alignment & responsiveness across CP dashboard (MCP_6753/6754/6800); back-navigation restored on OTP verification (MCP_6817/6881); exchange-rates "updated" timestamp displayed (MCP_6874/6792); send-money KYC tooltip guidance (MCP_6820/6909); admin price-rule ordering, margin handling, validation UX (MAP/API_6890, MAP_6780); freeze-transactions banner visibility in dark theme (MAP_6717/6867).

Release prepared on: 2026-05-05
