UAT Release Notes - 2026-05-12

Overview

MT-UAT release **v1.0.7** rolling up a large batch of medium/high security hardening (security headers, CSRF, open redirect, session rotation, PII storage, npm audit), Customer Portal UX polish (Send Money flows, masked account display, business onboarding asterisks, password reset), Admin Portal lookup-table and audit-log fixes, and API ledger/PD-webhook corrections. No database migrations this release; one `appsettings.json` config addition (`onfido.SdkReferrer`) must be populated in the UAT pipeline before merge.

Customer Portal

PR: [MT-UAT Release - Customer Portal \(2026-05-12\) v1.0.7](#)

#	Work Item	Description	Type
1	MCP_6901	Zero security headers	Task
2	MCP_6902	Open redirect via ?redirect= on login	Task
3	MCP_6903	PII persisted unencrypted across Zustand stores (localStorage)	Task
4	MCP_2782	Switch account Customer portal - Session Desynchronization and Data Leakage Across Multiple Browser Tabs	Bug
5	MCP_6276	Cash Collector Form Displays Raw Validation Error Instead of User-Friendly Message for Empty Address Field	Bug
6	MCP_6285	Customer Portal Onboarding - Valid Name with Apostrophe Rejected (First Name Validation Issue)	Bug
7	MCP_6286	Reset Password - Expired, Invalidated and already-used reset links allow form entry before showing invalid token error	Bug
8	MCP_6612	Customer Portal - Business Account Creation - Required Fields Not Indicated with Asterisk	Bug
9	MCP_6641	ACP - Misleading Error Terminology on Review Screen	Bug
10	MCP_6792	[Customer Portal] - [Home Dashboard - Exchange Rates] - Updated Time Not Displayed when viewing Latest Exchange Rates Section	Bug
11	MCP_6797	[Customer Portal] - Send Money - Misalignment in Masked Account Number and Currency Display when viewing selected beneficiary	Bug
12	MCP_6822	Customer Portal - Review Transfer - Transfer Summary - Fee, Exchange Rate and Total to Pay Not Highlighted	Bug
13	MCP_6823	Customer Portal - Send Money - Close Icon Used as Back Navigation - Confusing UX Behavior	Bug
14	MCP_7032	Logout is best-effort; server session not guaranteed revoked	Task
15	MCP_7033	No CSRF protection on mutating requests	Task
16	MCP_7041	Workflow sessionStorage keys persist after logout (partial list)	Task
17	MCP_7042	Known-vulnerable dependencies - npm audit: 8 vulns (5 high, 3 moderate)	Task
18	MCP_7044	Proxy forwards headers blindly & exposes raw error detail	Task

#	Work Item	Description	Type
19	MCP_7045	Error-sanitisation blacklist may hide legitimate validation errors	Task
20	MCP_7046	Onfido SDK token handling	Task
21	MCP_7051	Middleware exempts /business onboarding from auth redirect	Task
22	MCP_7052	Deprecated middleware file convention	Task
23	MCP_7527	[Customer Portal] - Signup - Registered user receives "Client Session Not Found" error after logout during re-registration attempt	Bug

Admin Portal

PR: [MT-UAT Release - Admin Portal \(2026-05-12\) v1.0.7](#)

#	Work Item	Description	Type
1	MAP_1453	KYC Rejection Reason Not Logged in Audit Logs	Bug
2	MAP_6734	Admin Portal - Corridors - Add corridor - Validation errors displayed as a single condensed toast message instead of individual field-level errors	Bug
3	MAP_7454	Admin Portal - Lookup Tables (Customer Types) - Newly Added Customer Type Not Reflected in Customer Portal Onboarding	Bug
4	MAP_7459	[Admin] - Lookup Tables - Branches - Generic "The requested resource was not found" error shown when submitting empty Add Branch form	Bug
5	MAP_7476	AAP - Ensure Consistent GBP/USD Source Currency Usage	Task
6	MAP_7478	AAP - Admin portal Countries table values changes	Task
7	MAP_7480	Admin Portal - Audit Logs - UI Overlap between IP Address and Timestamp columns	Bug
8	MAP_7482	Admin Portal - Audit Logs - Incorrect text wrapping/hyphenation in Notification message	Bug
9	MAP_7484	Admin Portal - Transactions - Unnecessary negative sign prefix for zero value "SpotOn Pay Fee"	Bug
10	MAP_7509	Admin Portal - Failed Transactions - Failure reason text is too technical and unformatted	Bug
11	MAP_7518	[Admin Portal] - Corridors - Max Amount Field Allows Excessive Digits and Returns Database Error	Bug
12	MT_-	Housekeeping: delete-functionality cleanup, @tiptap/extension-table pin (^3.22.4 — npm ci ERESOLVE), source/destination countries cleanup	Task

API

PR: [MT-UAT Release - API \(2026-05-12\) v1.0.7](#)

#	Work Item	Description	Type
1	API_2782	Switch account Customer portal - Session Desynchronization and Data Leakage Across Multiple Browser Tabs	Bug
2	API_6617	Customer Portal - Add cash collector - Incorrect validation logic for "Add Cash Collector" form (City/Postal Code)	Bug
3	API_6857	Admin Portal - Submit to Payment Distributor - Inconsistent API Response (400 Followed by 500 on Retry)	Bug
4	API_7034	Password change doesn't rotate session	Task
5	API_7046	Onfido SDK token handling	Task
6	API_7456	Admin Portal - Lookup Tables (Rate Providers) - 500 Internal Server Error When Adding Provider	Bug
7	API_7464	[Audit Logs API] - Negative PageNumber Causes 500 Internal Server Error	Bug
8	API_7476	AAP - Ensure Consistent GBP/USD Source Currency Usage (ledger overhaul: currency-level top-up, PD submission debit, IsSourceCurrency)	Task
9	API_7481	Admin Portal - Audit Logs - Incomplete "Changes" description in Audit Log Details	Bug
10	API_7505	AAP/PD New rule handling - Newly created price rules are added after all existing rules	Bug
11	API_7509	Admin Portal - Failed Transactions - Failure reason text is too technical and unformatted (PD limit violations formatted with currency)	Bug
12	API_7512	Adjust money back while failed transaction in admin portal ledger (reverse payout ledger debit on PD Failed webhook)	Task
13	API_7518	[Admin Portal] - Corridors - Max Amount Field Allows Excessive Digits and Returns Database Error (DB-overflow guard on corridor save)	Bug
14	MT_-	Infrastructure: DB connection string builder for Db:* env-var deployments	Task

Key Highlights

- **Security hardening (Customer Portal):** full sweep of medium/high findings — added security headers (6901), blocked open redirect on login (6902), encrypted PII in Zustand stores (6903), added CSRF protection (7033), cleaned up sessionStorage on logout (7041), patched npm audit vulns (7042), tightened

proxy header forwarding (7044), recovered legitimate validation errors from over-eager sanitisation (7045), fixed Onfido SDK token flow (7046 — paired with API_7046 and new `Onfido.SdkReferrer` config), tightened logout server-session revocation (7032), and replaced the deprecated `middleware.ts` with `proxy.ts` (7051, 7052).

- **Session integrity (CP + API):** multi-tab switch-account desync fixed end-to-end (MCP_2782 + API_2782), and password change now rotates the session (API_7034) so old tokens can no longer be replayed.
- **Customer Portal UX polish:** required-field asterisks on business onboarding (6612), masked account/currency alignment in beneficiary selection (6797), highlighted summary numbers on Review Transfer (6822), corrected close-vs-back navigation (6823), exchange-rates timestamp restored (6792), validation-message clarity for cash collectors (6276), apostrophe-friendly first name validation (6285), expired/used password-reset link handling (6286), "Information Required" instead of "Transfer Failed" wording (6641), and re-registration session error resolved (7527).
- **Admin Portal lookup tables & audit logs:** KYC rejection reasons now flow to audit logs (1453), branch-form empty-submit now shows field-level errors (7459), customer type lookup hidden where stale (7454), rate-provider add no longer 500s (paired API_7456), bank-create form gets client-side validation, deterministic display order, autofill theme fix (7459 follow-up), audit log column/wrapping fixes (7480, 7482), and incomplete audit-log "Changes" description fixed (paired API_7481).
- **Corridors & price rules:** per-field validation on corridor add (6734), max-amount frontend cap + API DB-overflow guard (MAP_7518 + API_7518), and price rules now append to the correct slot (API_7505).
- **Payment Distributor & Ledger (API):** inconsistent PD submit response fixed (6857), reverse payout debit on Failed/Cancelled webhook (7512), currency-level top-up + `IsSourceCurrency` on ledger (7476), and failure-reason formatting with currency symbols in status history (7509).
- **API misc & infra:** negative PageNumber no longer 500s on audit logs (7464); city/postal-code rules made consistent CP+API (6617 + MCP business onboarding); new DB connection string builder for `db:*` env-var deployments.

Release prepared on: 2026-05-12

PRs: Customer Portal | ☐ 1418 Industry: Conditional input field not displayed when "Other" is selected | Done

| Admin Portal | ☐ 1419 The validation message still persists after valid data is entered | Released | API #1420
